

55mm Tapepro Corner Glazer (CG-55)

The new Tapepro 55mm Corner Glazer lets you glaze off taped internals with ease. First, apply the tape using one of our automatic taping tools or by hand, then bed the tape in with the Tapepro Corner Roller. After that, all you have to do is run the 55mm Corner Glazer from top to bottom and it will simultaneously wipe off excess compound and feather the edges leaving you with a perfect first coat.

After the joint has dried it is easy to finish coat with a Tapepro Corner Box and Corner Finisher, or the new 75mm Corner Glazer.

Billet aluminium ball socket block

Durable Ascetal skid

TECHNICAL INFORMATION

The Tapepro Corner Glazer features a flexible stainless steel mount (the CG001A Brace) which allows the glazer to adjust to different internal angles like a corner finisher.

The body is made from rugged 304 Stainless Steel, and is fitted with durable ascetal skids.

The precision machined ball socket block snap fits to the Tapepro Corner Finisher Handle (CFH-1200), allowing a wide range of movement.
